	Examiner Patrick D. Niland	Art Unit 1714	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1714

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-4, 6-7, and 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pub. No. 2002/0077389 A1 Dworak et al..

Dworak discloses maleate oils for use in making the disclosed resin AB at page 2, section [0020] and page 3, section [0021]. Where the polyol B of page 1, sections [0010] through [0012]; page 2, sections [0015] and [0020]; page 3, sections [0024] and [0025] contain acid groups, they read on component C of the instant claims. The process of the reference reads on the instant claims 6-7. The composition containing the polyurethane of page 4, section [0029] reads on that of the instant claims 9-10.

4. Claims 1-4, 6-7, and 9-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Pub. No. 2002/0077389 A1 Dworak et al..

Dworak discloses maleate oils for use in making the disclosed resin AB at page 2, section [0020] and page 3, section [0021]. Where the polyol B of page 1, sections [0010] through [0012]; page 2, sections [0015] and [0020]; page 3, sections [0024] and [0025] contain acid groups, they read on component C of the instant claims. The process of the reference reads on

Art Unit: 1714

the instant claims 6-7. The composition containing the polyurethane of page 4, section [0029] reads on that of the instant claims 9-10.

It would have been obvious to one of ordinary skill in the art at the time of the instant invention to use the above discussed combinations of ingredients because they are encompassed by the reference and would have been expected to give a coating having the properties discussed therein.

5. Claims 5 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The instant claims do not describe the inventions of the instant claims 5 and 8 nor provide rationale to modify the prior art compositions and methods with the limitations of the instant claims 5 and 8.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick D. Niland whose telephone number is 571-272-1121. The examiner can normally be reached on Monday to Thursday from 10 to 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan, can be reached on 571-272-1119. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
